

Emery County School District

Policy: GBB—Staff Involvement in Decision Making

Date Adopted: 17 August 1988
Current Review / Revision: 12 November 1997

The Board will encourage employees to contribute their ideas for the betterment of the school district. The staff will be asked to help in developing policies and regulations, in establishing goals and objectives, and in planning curriculum, services, budget and facilities.

Administrators will exercise their powers and duties in ways consistent with democratic ideals and institutions. They will make recommendations and initiate new procedures only after seeking and giving consideration to the opinions of staff members. The Board expects opportunities to be provided for democratic participation of teachers and other employees in planning working situations and arrangements.
